2 Tools Required

3 Planning & Preparation

Determine the wall type that you have (i.e. Brick/Stud/Plasterboard/Sheetrock).

Ensure the drilling area is free from mains services (Gas/Electric/Water).

Drill three 3mm pilot holes to verify the wall type and select the appropriate fixings (See Section 5).

4 Marking Wall For Drill Points

Use the wall bracket (A) as a template and position it on your wall. Ensure the bracket is level and mark the three drill points with a pencil.

5 Fit Bracket To Wall

Use the correct fixings for your wall type. Mixing fixing types may be required for installations that span different wall types. DO NOT OVER TIGHTEN SCREWS.

Solid Wall

Plasterboard/ Sheetrock

Wood Stud

Option 1

Option 2

Only one fixing will be in the wood stud.
The other fixings will be in
plasterboard/ sheetrock(see above).

Metal Stud

Option 1

Option 2

Only one fixing will be in the metal stud. The other fixings will be in plasterboard/ sheetrock.

6 Shelf Assembly

7 Assemble

Select desired shelf and spacer configuration, ensuring at least one spacer (E) is at the top.

Ensure locating bracket is securely in place & slide assembled shelf unit (C,D) into the wall bracket.

8 Final Assembly

9 Additional Shelf Location

Mark the wall for drill points following sections 4 and 5.

x2

Repeat assembly using sections 6, 7 and 8.
